OBJECTIVE

Engineering student with the passion for building beautiful and user friendly web applications.Capable to work hard and smart with full dedication and determination to achieve self and organization goals.

AREA OF INTEREST

- FULL STACK DEVELOPMENT
- MOBILE APPLICATION DEVELOPMENT

PROJECTS

Real Estate Website using MERN Stack,JWT,Firebase,OAuth:

- A real-time website for realtors and users to buy, sell or rent houses across the globe.
- Users can sign-in or signup and can add or view listings and sort it based on date, cost and also based on the availability of facilities.

BMI Calculator (Flutter Mobile Application):

- Developed a mobile application using Flutter to calculate Body Mass Index (BMI) based on user input of height and weight. The app provides real-time feedback on BMI status, including categories like underweight, normal, overweight, and obesity. Implemented a clean user interface and optimized for both Android and iOS platforms

Personal Portfolio (HTML, CSS, JAVASCRIPT) :

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase my skills, projects, and professional experience. Designed with a modern, user-friendly interface and optimized for performance and accessibility, the website highlights my expertise.

INERTNSHIP

- Android Application Development in National Small Industries Corporation - Technical services centre.
- Web Development in Kinitous LLP.

CERTIFICATIONS

- Programming in Java in NPTEL.
- HTML and CSS in Udemy.
- Node with React in Udemy.
- Learn MySQL - For Beginners - in Udemy.
